

## **Robotic Assisted Gynecological Surgeries Performed at Copper Ridge Surgery Center**

**March 15, 2021, Traverse City, MI** – Gynecological procedures are now being performed at Copper Ridge Surgery Center with the state-of-the-art *da Vinci* Surgical System.

The *da Vinci* Surgical System is designed to help surgeons perform minimally invasive surgery and provides them with high-definition 3D vision, magnified view, and robotic and computer assistance. The *da Vinci* Systems are not programmed to perform surgery independently, but instead, the procedure is performed entirely by a surgeon who controls the system.

“The *da Vinci* Surgical System may be the most effective treatment option, making it a benefit for all women who require surgery for gynecological issues. There are many benefits to the patient by using this robotic-assisted technology. The *da Vinci* Surgical System is less invasive, and patients experience less scar tissue and less post-op pain. Our surgical patients experience faster recovery and can have their procedure done in an Ambulatory Surgery setting,” states William E. Nowak, D.O.

William E. Nowak, DO, FACOOG is a Board Certified Obstetrician/Gynecologist at the Women’s Health Pavilion in Williamsburg and has surgical privileges at Copper Ridge Surgery Center.

*Copper Ridge Surgery Center is located at 4100 Park Forest Drive, Traverse City, Michigan. For more information, please call 231.392.8900 or visit [www.surgerytc.com](http://www.surgerytc.com).*
